

In the claims:

Please amend the claims as follows:

1-25. (Cancelled)

26. (New) A method for creating entries in an on-line database in a user-defined category comprising:

receiving a request from a user to create an entry in an on-line database;

creating an entry in the on-line database;

receiving a category defined by said user for said entry and one or more keywords associated with said category; and

associating said entry with said category.

27. (New) The method of claim 26, wherein said entry includes non-textual content.

28. (New) The method of claim 27, wherein said non-textual content comprise graphics.

29. (New) The method of claim 26, further comprising the act of allowing said user to index said selected entry in said on-line database with at least one user-defined keyword.

30. (New) The method of claim 26, further comprising the act of allowing said user to add a URL to said entry in said on-line database.

31. (New) The method of claim 26, further comprising the act of allowing said user to add a hyperlink to said entry in said on-line database.

32. (New) An apparatus for creating entries in an on-line database in a user-defined category comprising:

means for receiving a request from a user to create an entry in an on-line database;

means for creating an entry in the on-line database;

means for receiving a category defined by said user for said entry and one or more keywords associated with said category; and

means for associating said entry with said category.

33. (New) The apparatus of claim 32, wherein said entry includes non-textual content.

34. (New) The apparatus of claim 33, wherein said non-textual content comprise graphics.

35. (New) The apparatus of claim 32, further comprising means for allowing said user to index said selected entry in said on-line database with at least one user-defined keyword.

36. (New) The apparatus of claim 32, further comprising means for allowing said user to add a URL to said entry in said on-line database.

37. (New) The apparatus of claim 32, further comprising means for allowing said user to add a hyperlink to said entry in said on-line database.

38. (New) A web server for creating entries in an on-line database in a user-defined category comprising:

a web server and an associated database, the web server including an HTML front-ending process configured to:

receive a request from a user to create an entry in the database;

create an entry in said database;

receive a category defined by said user for said entry and one or more keywords associated with said category; and

associate said entry with said category.

39. (New) The web server of claim 38, wherein said entry includes non-textual content.

40. (New) The web server of claim 39, wherein said non-textual content comprise graphics.

41. (New) The web server of claim 38, further configured to allow said user to index said selected entry in said on-line database with at least one user-defined keyword.

42. (New) The web server of claim 38, further configured to allow said user to add a URL to said entry in said on-line database.

43. (New) The web server of claim 38, further configured to allow said user to add a hyperlink to said entry in said on-line database.
